

# Tidy Team Audit

Litter is rubbish that hasn't been put in the bin.

It can be very bad for animals of all sizes; they can get stuck inside or hurt themselves on sharp edges.

Litter can also be dangerous for humans.

Sometimes people drop litter on purpose but sometimes it blows out of bins or falls out of pockets and bags.

Find out how much is reduced and reused by looking for answers to the questions below.

Can you find litter on the floor around your setting or yard?	<b>NO</b> 😊	<b>YES</b> ☹️
Do all the children always put their rubbish in a bin?	<b>YES</b> 😊	<b>NO</b> ☹️
Do any of the children find litter on the ground on their journey to the setting?	<b>NO</b> 😊	<b>YES</b> ☹️
When you go for a walk, do you think there are enough bins for people to use?	<b>YES</b> 😊	<b>NO</b> ☹️
Do you ever do a litter pick and count how much rubbish you find?	<b>YES</b> 😊	<b>NO</b> ☹️

If you have any answers with sad faces think about, what could you change in your setting to make them happy faces?

What do we want to change?	How will we change it?	What difference did we make after we made the change?
