

Wonderful Wildlife Audit

Animals, just like people, need three basic things to survive, somewhere safe to live, food to eat, and water to drink.

The place where animals live is called its habitat.

To explore this, have a look around you're setting and notice what's already there for wildlife.

Next, think about what might be missing?

After your investigation, talk together about what you could add to make the area more wildlife friendly. Keep ideas simple and practical.

The goal is to make your space feel welcoming for wildlife by providing what they need to live safely and comfortably.

Log pile

Stone pile

Wild areas

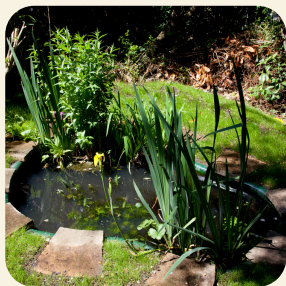

Water for wildlife

Flowers or herbs

Minibeast hotel

Pond

Bat box

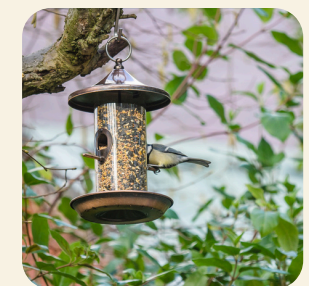

Plants with berries

Bird house

Hedgehog house

Bird feeders

Can you choose one thing that you could do to help wildlife in your setting and add your idea to the action plan below?

What do we want to change?	How will we change it?	What difference did we make after we made the change?
